- Node.js
- SQL
- MongoDB

OTHER TOOLS

- Jira
- Leankit
- Azure DevOps
- Indigo Studio
- Git, SVN
- TeamCity

PROJECTS

[TINO IQ - Ionic Application ↗](#)

I got this project from upwork
Converted whole app from Ionic 2 to Ionic 5.
Integrated facebook and google authentication.
Uploaded this app on Playstore and have 1k+ downloads.

[Corona Tracker - Ionic PWA ↗](#)

Made this app to get current corona statistics all around the world.
Created backend in nodejs and called external api to get those statistics.
Integrated twitter api to get tweets of famous Covid hashtags.

[QR - Barcode Scanner - Ionic PWA ↗](#)

An application to scan QR / Barcode. You don't need to install any external application if you use this PWA.

[Image Compressor - React App ↗](#)

An application to reduce your image size and you can save the space of your hard disk/mobile
You can use those compressed images to reduce app load time or any other way you want

[Chat App - React App ↗](#)

An application to do a group chat with new joiners and leavers message.
Backend is written in Node.js which you will find out in the readme description of repository

[Tasks By Planner - React Material App ↗](#)

If you are familiar with tasks by planner which is provided by Microsoft Teams, then you might have a good idea about this app.
Live app demo is already provided in repository's readme description.
[Repository Link ↗](#)

[ng-password-validation - Angular.js Package ↗](#)

Angular.js package which helps you to integrate password and retype password in registration form.

[ng-alphabetic-filter - Angular.js Package ↗](#)

Angular.js package which helps you to filter data based on first letter of your record
This directive will generate A-Z buttons based on your property value and filter records when you click on any of those A-Z buttons.
