Summary

I enjoy being challenged and love working on projects that require working out of my comfort zone and skill set. I'm looking for remote job opportunities to put my excellent problem solving skills to use.

I love to bring ideas to life by creating modern and responsive web experiences.

I love to learn and bounce ideas off of other people.

I am also the contributor at material ui library

Skills

React • JavaScript • TypeScript • Material ui • Node.js • Git • Open source software • Angular

Work Experience

Senior Software Engineer
Apr 2022 – present

EPAM Anywhere (EPAM Systems) • Full-time

Remote

Technologies: React • JavaScript • TypeScript • Accessibility

- Implementing the accessibility features for the people who are physically challenged, so that they can use the application as same as other users are using
- Finding missing accessibility functionalitites according to regions as well

May 2021 – Apr 2022 • 11 mos

Vebholic Pvt. Ltd. • Full-time

Remote

Technologies: React • Material ui • Node.js • MongoDB • Npm

Project #1

- Implemented project setup from scratch (including PWA and lazy loading integration)
- Made a common component with improved functionalities and replaced material ui table in whole application
- Wrote helper functions and common code to reduce developer's time
- Helping other developers who stuck somewhere in code or logic.
- Review the PR of frontend developement was one of the job of mine as well.

Software Engineer
Jun 2020 – May 2021 • 11 mos

Thomson Reuters • Full-time

Remote

Technologies: jQuery • jQuery UI • .net framework • C# • SQL

PROJECT #1 - CAPITAL CONFIRMATION

- Was working on on-going product that is almost 11 years old.
- Primary role was to implement new functionalities and solve existing production issues.
- Converted old C# code into executable job which can execute on specific time every day.
- Created an logic formula file to generate sql script for all the records to save development hours and efforts.

Brain TecLabs Pvt. Ltd.   Jun 2015 – Mar 2020 • 4 yrs 9 mos

<u>Sr. Software Engineer</u> • Full-time

Ahmedabad, India

Technologies: Angularjs (1.x) • Angular • Ionic • .net framework • C#

PROJECT #1 - BRAIN PAYROLL

- Worked on a product called Brain Payroll (U.K. Payroll)
- Implemented Company, Employee import functionality to import thousands of records from excel sheet.
- Implemented frontend code such a way that validate thousands of records with common validations on frontend and reduced validation time from 9 minutes to 45 seconds.
- Implemented Leave management module in Brain Payroll Admin, Employee and Company Portal
- Implemented Gender Pay Gap module.
- One of the developer of Brain Payroll app which was created in Ionic.

PROJECT #2 - CUSTOM IMPORT EXPORT COMPONENT

- Component which accept excel/csv as an input and map with table's fields with it and import sheet's data to table
- This helped a lot of developers with in the organization and saved a lot of time when they needed to import data from excel/csv sheet
- Frontend was built in angular.js, bootstrap and backend in .Net C#, sql

PROJECT #3 - HUMAN RESOURCE MANAGEMENT SYSTEM

- Implemented HRMS system for internal use (Only developer)
- Read data from biometric device (thumb scanner) and processing the data to get in-out time of employees.
- Implemented E.S.S. (Employee Self Service) module in which employee can ask for full day or half day leave and that request goes to high level employee for apporaval. Email also sent to personal email id of the both parties (Requester and Approver)
- This HRMS system was built in .Net MVC, SQL, Bootstrap.

Projects

<u>alt-lodash</u>   Jan 2023 – present

1 coworker

Technologies: TypeScript • Markdown • Jest • Open source software

If you're a JavaScript developer, you're probably familiar with the Lodash library. It's a popular utility library that provides a wide range of helper functions for common tasks, such as manipulating arrays and objects, working with strings, and handling data types. However, as powerful as Lodash is, it's not always the best fit for every project.

Enter alt-lodash, a new alternative library that aims to provide many of the same features as Lodash, but with a few key differences. In this article, we'll take a closer look at what alt-lodash is, how it differs from Lodash, and some examples of how you can use it in your own projects.

<u>r-spinners</u>   Jul 2022 – present

1 coworker

Technologies: React • TypeScript

Ionic PWA app which can show you current Covid-19 cases all around the world and also implemented twitter api with Covid-19 related hashes

<u>React Helper Hooks</u>   Oct 2021 – present

1 coworker

Technologies: React • JavaScript • TypeScript

I have implemented whole frontend of this application, I got this project from Upwork

My Corona Tracker

Mar 2020 – Mar 2020 •

1 coworker

Technologies: Ionic • Angular • Twitter api

Collection of react spinners for react projects

https://www.npmjs.com/package/r-spinners

TINO IQ Finance Stock ETF Currency Trading Invest

Apr 2020 – May 2020 • 1 mo

2 coworkers

Technologies: Ionic • Angular • Google api • Facebook graph

I have implemented whole frontend of this application, I got this project from Upwork

Educations

Master's degree: Information Technology

Jun 2012 – May 2015 • 2 yrs 11 mos

Gujarat Technological University

Ahmedabad, India
Grade/GPA: 3.39

Languages

English (Professional working proficiency)

Hindi (Native or bilingual proficiency)
